Grow Green, Grow Better

Empowering Growth with Nature's Best.

Aadhiya Imports and Exports is a leading manufacturer and supplier of high-quality coco peat products, specializing in providing sustainable and eco-friendly solutions for agriculture, horticulture, and landscaping industries. Our company harnesses the natural benefits of coconut coir, turning it into versatile, environmentally-friendly products that promote healthy plant growth and soil improvement.

Mission

To provide sustainable, eco-friendly coco pith solutions that enhance soil health and promote agricultural productivity, while preserving natural resources for future generations.

Vision

To be a global leader in the natural, renewable resource industry, fostering a greener planet by transforming waste into sustainable growth opportunities for farming and horticulture communities worldwide.

Premium Quality

We are dedicated to delivering the finest quality products through a rigorous quality assurance process at every stage of production. We exclusively use top-grade raw materials, including cocopeat, coconut husk chips, and coconut fiber sourced from fresh coconuts grown in the lush tropical lands of south tamilnadu India.

Sustainable Growth

Our coir fiber, cocopeat, and coconut husk chips are fully biodegradable and environmentally friendly. They can be safely disposed of without causing any harm to the environment and will not affect the pH levels of surrounding soil. At Planet's Pick, we are committed to ensuring zero impact on nature in every production process, as we rely on the natural world for our resources.

100% Natural & Biodegradable

All our products, made from cocopeat, coir fiber, and coconut husk chips, are 100% natural and biodegradable, contributing to a healthier planet.

What is Coir Peat?

Coir peat, also known as coconut coir or coco peat, is an organic material derived from the fibrous husks of coconuts. As a byproduct of the coconut industry, it serves as an excellent soil amendment and growing medium.

Structure

Composed of the fibrous husk surrounding the coconut fruit, coir peat is typically processed into a compressed form that expands upon hydration.

Key Properties

Water Retention

Retains moisture, reducing the need for frequent watering.

Aeration

Promotes healthy root growth by preventing soil compaction.

pH Level

Neutral to slightly acidic, suitable for a variety of plants.

Environmental Benefits

Sustainability

A renewable alternative to peat moss, reducing environmental impact.

Recycled Product

Utilizes waste materials from coconut processing.

Versatile Applications

Potting Mix

Ideal for container gardening

Soil Amendment

Enhances garden soil texture and moisture retention.

Seed Starting

Provides a sterile, lightweight medium for germination.

5kg Cocopeat Blocks

Coco Peat is the non-fibrous, spongy, light weight, corky material that holds together the coir fibre in coconut husk. It is washed, dried & compressed into 5kg blocks. Cocopeat is an excellent growing medium and ideal substitute for peat moss. Cocopeat is a 100% natural growing medium.

650g Cocopeat Blocks

Made from washing, drying and compressing Cocopeat. It is widely used as a growing medium for flowers, vegetables, indoor & outdoor plants.

Coir Husk Chip Block

We offer 100% Coir Husk Chips Blocks. These are perfect mixture and come with many sieve size variants. Husk Chips blocks are preferred for growing plants which require good aeration for the roots. These are also organic alternative for perlite and vermiculite.

Grow bags

Grow Bags are popular choice for multipurpose growing medium for vegetables, fruits & flowers. Our Grow Bags are 100% natural and made up of a special blend of coir pith and chips, designed to provide the ideal air to water ratio for hydroponics.

Coco Coir Fibre

Coir fibre is a versatile natural fibre extracted from mesocarp tissue, or husk of the coconut. The husk contains 20% to 30% fibre of varying length. After grinding the husk, the long fibres are removed and baled into 140 kgs and used for various industrial purposes.

Coco Coir Mats

Coir mats are made up of 100% natural fibres. These environmentally-friendly, natural fibres are derived from the husk of the coconut. The husk is the water-resistant layer between the outer coating of the coconut and the hard shell inside. The fibres of coir are known for their strength and resilience, after all, they protect the coconut from a variety of conditions, and its waterproof property helps to keep the coconut flesh fresh even if it has floated for many days across the sea.

High Quality Coconut Bowl

This bowl is made of coconut shells which are collected, cut, cleaned and sanded become beautiful coconut bowls. It can be used to eat food and Ice cream.

It is Eco-Friendly and easily disposable.

Coir Nets

Grow Bags are popular choice for multipurpose growing medium for vegetables, fruits & flowers. Our Grow Bags are 100% natural and made up of a special blend of coir pith and chips, designed to provide the ideal air to water ratio for hydroponics.

Grow Better, Naturally!

Experience the difference coir peat can make in your gardening or horticultural projects. Its sustainable, versatile, and economical nature makes it the perfect choice for eco-conscious gardeners and professionals alike.
